from the acclaimed author of new york 2140 and red mars this nyt bestselling novel tells the story
of a future where humanity has populated miraculous new habitats engineered across the solar
system and the one death that triggers a precarious chain of events that could destroy it all the
year is 2312 scientific and technological advances have opened gateways to an extraordinary future
earth is no longer humanity's only home new habitats have been created throughout the solar
system on moons planets and in between but in this year 2312 a sequence of events will force
humanity to confront its past its present and its future the first event takes place on mercury on the
city of terminator itself a miracle of engineering on an unprecedented scale it is an unexpected
death but one that might have been foreseen for swan er hong it is an event that will change her
life swan was once a woman who designed worlds now she will be led into a plot to destroy them

award winning epics like the mars trilogy and groundbreaking alternative histories like the days of
rice and salt have brought kim stanley robinson to the forefront of contemporary science fiction

mixing subject matter from a dizzying number of fields with his own complex ecological and philosophical concerns robinson explores how humanity might pursue utopian social action as a strategy for its own survival robert markley examines the works of an author engaged with the fundamental question of how we as individuals as a civilization and as a species might go forward by building stories on huge time scales robinson lays out the scientific and human processes that fuel humanity s struggle toward a more just and environmentally stable world or system of worlds his works invite readers to contemplate how to achieve and live in these numerous possible futures they also challenge us to see that sf s literary cultural and philosophical significance have made it the preeminent literary genre for examining where we stand today in human and planetary history
