what is it the public administration genome project pagp is a grand attempt to digitally map and then usefully employ the full set of topics variables and interrelationships that comprise and involve all of the genes that make up public administration it is based on the highly regarded and useful human genome project why do it like the world in general the p a world is becoming more diverse and complicated hence few administrators can be expected to know much less remember the many relevant strategies external forces and related impacts that might be part of a particular situation there thus is a need for a comprehensive logic based readily accessible system called compass to help in finding and elaborating on such topics variables and interrelationships what is in the book it starts with a broad overview of the whole pagp it then turns to an elaboration of both the basic and then the more comprehensive analogies with the human genome the human genome project and other related concepts like catalysis and evolution these are followed by a set of new and seemingly unconnected subjects a norms for citizens and public administrators and b

semantic and syntactic analyses then come some interesting and diverse case studies and comparisons of such to theories all these set the scene for development of procedures for contributing to and using compass the information and guidance system which is the central product of the pagp the whole concept of the pagp subsequently is revisited through an example that encompasses all of its major elements and processes the last part of the book focuses on future directions asking questions like is the pagp and compass an impossible dream or a much needed reality
