far removed from the markets they re meant to serve insensitive to market needs inflexible in how they do business america s oliuopolistic corporations are terrorizing consumers the result is that the american market system does not work as it should and indeed performs far below its potential samli argues that the system should not be treated as though it were sacrosanct indeed it must be made to do more than it is doing to encourage competition and create consumer value things it neglects says samli because of a mistaken notion that laissez fairism is working well and that in today s free economy things are just fine not so and corporations are actually suffering on their bottom lines by creating true consumer value and by stopping their headlong rush to merge and thereby decrease competition corporations can achieve their profit goals more easily and even establish higher ones the trick is to pay more attention to their customers to be more responsive to their needs and wishes and in samli s words to turn a kinder and gentler face to the world his book is a challenging provocative declaration for policy makers in the public and private sectors and for academics an important adjunct to their studies of how business government and society interact first says samli merger mania must stop government must exercise its full power to protect inform and educate consumers and take care that business unchecked does not prey upon them he cites evidence that consumers are not equal that many are frail and vulnerable and that in many markets they are simply being ignored samli maintains that far from being hostile to business he sees business as actually working against itself if business thinks of and works for the benefit of the consumer if it eschews strategies that simply cut costs and contribute to self enlargement consumers will become empowered in fact samli calls for more regulation not less and for more competition he also calls for consumers who are better educated and for the nation to cultivate its resources human and environmental in ways that will enhance economic performance not only for society that depends on corporations but for corporations themselves that depend on society
