presents a humorous guide to battling mutinous robots including tips for deactivating rebel servant robots and escaping from a murderous smart house

many people have maintained a certain suspicion toward robots especially as they ve become more integrated into our lives they work in factories and hospitals aid in law enforcement and even vacuum our homes some wonder what would happen if robots take over keep calm all the answers to surviving the robot revolution are in this electrifying volume which describes the best strategies to battle the malevolent forces of artificial intelligence readers will love this page turning experience which includes accessible text and thrilling images that stir the imagination

this book brings together the contributions of leading researchers in the field of machine intelligence covering areas such as fuzzy logic neural networks evolutionary computation and hybrid systems there is wide coverage of the subject from simple tools through industrial applications to applications in high level intelligent systems which are biologically motivated such as humanoid robots and selected parts of these systems like the visual cortex readers will gain a comprehensive overview of the issues in machine intelligence a field which promises to play a very important role in the information society of the future

in this short introduction david j gunkel examines the shifting world of artificial intelligence mapping it onto everyday twenty first century life and probing the consequences of this ever growing industry and movement the book investigates the significance and consequences of the robot invasion in an effort to map the increasingly complicated social terrain of the twenty first century whether we recognize it as such or not we are in the midst of a robot invasion what matters most in the face of this machine incursion is not resistance but how we decide to make sense of and respond to the social opportunities and challenges that autonomous machines make available how to survive a robot invasion is a fascinating and accessible volume for students and researchers of new media philosophy of technology and their many related fields it aims both to assist readers efforts to understand a changing world and to provide readers with the critical insight necessary for grappling with our science fiction like future

the two volume set Incs 4984 and Incs 4985 constitutes the thoroughly refereed post conference proceedings of the 14th international conference on neural information processing iconip 2007 held in kitakyushu japan in november 2007 jointly with brainit 2007 the 4th international conference on brain inspired information technology the 228 revised full papers presented were carefully reviewed and selected from numerous ordinary paper submissions and 15 special organized sessions the 116 papers of the first volume are organized in topical sections on computational neuroscience learning and memory neural network models supervised unsupervised reinforcement learning statistical learning algorithms optimization algorithms novel algorithms as well as motor control and vision the second volume contains 112 contributions related to statistical and pattern recognition algorithms neuromorphic hardware and implementations robotics data mining and knowledge discovery real world applications cognitive and hybrid intelligent systems bioinformatics neuroinformatics brain computer interfaces and novel approaches

describes how to assemble and deploy a robot army to fight evil beings such as zombies vampires and werewolves

the major challenges of the 21st century faced by human beings are how to achieve water security food security energy security and environmental security owing to enhanced natural anthropogenic disasters worldwide these challenges become much more complicated and daunting especially for developing countries therefore it is important to highlight the risk of different disasters as well as the modern tools and techniques for minimizing disaster incidence and losses disaster management being highly multidisciplinary in nature a comprehensive book dealing with different aspects of disaster management and encompassing important disasters faced by humankind is presently not available this book is an attempt to fulfill this gap it provides clear comprehensive and up to date information about different facets of disaster management along with salient case studies the book highlights the current status of disaster management focusing on developing nations discusses vital issues such as climate change and sustainable development modern approaches and tools techniques and the challenges of and future r d needs for sustainable disaster management

this collection contains 72 papers presented at space 2002 and robotics 2002 held in albuquerque new mexico march 17 21 2002

this collection contains 54 papers presented at an asce specialty conference on robotics for challenging environments held in albuquerque new mexico february 26 march 3 1994
