leading scholars from Italy and the United States offer a fresh and nuanced image of the religious reform movements on the Italian peninsula in the sixteenth and seventeenth centuries united in their conviction that religious ideas can only be fully understood in relation to the particular social cultural and political contexts in which they develop these scholars explore a wide range of protagonists from popes bishops and inquisitors to humanists and merchants to artists jewelers and nuns what emerges is a story of negotiations mediations compromises and of shifting

boundaries between heresy and orthodoxy this book is essential reading for all students of the history of christianity in early modern europe

this title was first published in 2002 culture and enlightenment are the two words that best characterise the essence of györgy markus's career in whose honour this book is published markus devoted the last twenty years of research towards a theory of cultural objectivations and their pragmatics and the great depth of his knowledge of the history of culture and philosophy informs all his teaching and writing the pursuit of enlightenment ideals attains reflective self consciousness in markus's works forged in the knowledge of its own historicity of the embeddedness of rationalities in culture and in an awareness of the paradoxes that cling to the conscious affirmation of ideals which are no longer self evident or beyond questioning in taking up the challenge of these paradoxes markus spans the whole history of modern philosophy and culture with a matchless authority this book draws together contributions from leading figures in contemporary philosophy who are also friends colleagues and former students of györgy markus the book is divided into two sections the first presents critical assessments of various aspects of markus's wide ranging works the second presents contributions in celebration of his influence and his wide interests in their critical assessment of markus's work and in the demonstration of his influence the contributors hope to convey something of the breadth and something of the excitement of doing philosophy in the company of györgy markus

to place animals within the realm of nature means inserting them among the articulations of culture and the social semiotics has never avoided this chiasmus choosing to deal from the outset with the problem of the languages of animals following the old admonition of montaigne it is not that animals do not talk it is us who do not understand them recent research in the field of the anthropology of nature and sociology of sciences and techniques allow to think about the zoosemiotic issue in a different way instead of transplanting the language structures gestures lis etc for a semiotic study of the forms of the human and social meaning it seems more apt to look at their discourse and as such the actual interactions communicative and scientific as well as practical and functional between humans and non humans this book aims to investigate precisely this hypothesis known here as zoosemiotics 2.0 working on several fronts and levels anthropology languages of the image and visual representations from art history to cinema old and new media from literature to comics from cartoons to tv documentaries but also advertising music and social networks all those cultural products that talk about the role of human and non human in society implicitly proposing and in some way imposing a form of articulation of such a relationship food and feeding rites animalist vegetarian and vegan movements philosophy metaphysics ethics aesthetics

the modern concept of nature appeared during the 17th century nature as a mechanical object to be submitted to reason man a long tradition refers to the concept of nature in the greek physis it is referring to a dynamic process that engages in criticizing the modern paradigm of nature as opposed to culture as it is

the principle of the domination and exploitation by humans of what we consider as nature is at the heart of the ideological economic and financial models imposed by neoliberal capitalism based on the objective of growth this model shapes and destroys human communities as well as the environment on which they rely and sustain the climatic urgency as well as the limited capacity of the resources of the earth require a transition towards an ecosocialism for another world the anthropological confrontation with the greek physis invites to a break with capitalism based on a large scale and speedy use of technologies and with the only objective of financial gain the result has been destructive productivism instead we have to take into account the complexity of and interactions between human societies and their technical practices in their environment the survival of one or the other is at stake in sum nature is culture contents preface to the english edition 3 introduction 9 between nature and culture 15 i humans and their milieu in ancient greece 19 ii from the enlightenment philosophers to modern anthropologists 37 iii beyond anthropological determinisms permeabilities 47 iv the human being and its environment interactive relationships 57 v for an ecosocialist understanding of humans and their milieu 65

cultural accounts of scientific ideas and practices have increasingly come to be welcomed as a corrective to previous and still widely held theories of scientific knowledge and practices as universal the editors caution however against the temptation to overgeneralize the work of culture and to lapse into a kind of essentialism that flattens the range and variety of scientific work the book refers to this tendency as culturalism the contributors to the volume model a new path where historicized and cultural accounts of scientific practice retain their specificity and complexity without falling into the traps of culturalism they examine among other issues the potential of using notions of culture to study behavior in financial markets the ideology organization and practice of earthquake monitoring and prediction during china s cultural revolution the history of quadratic equations in china and how studying the glass ceiling and employment discrimination became accepted in the social sciences demonstrating the need to understand the work of culture as a fluid and dynamic process that directly both shapes and is shaped by scientific practice cultures without culturalism makes an important intervention in science studies contributors bruno belhoste karine chemla caroline ehrhardt fa ti fan kenji ito evelyn fox keller guillaume lachenal donald mackenzie mary s morgan nancy j nersessian david rabouin hans jörg rheinberger claude rosenthal koen vermeir

the book provides a comprehensive overview of the european sustainability model which cannot be properly understood without taking into account the global governance trends surrounding the topic the author offers a fresh analysis of both theory and praxis of sustainable development in the open ended process of eu integration by shedding new light on the often overlooked role that law and legal science should have within the educational and cultural domains the monograph explores the necessity of new conceptual and methodological approaches in order to

understand the emerging educational and cultural challenges when it comes to their integration and intersection with sustainability in today's society which desperately claims systemic transformations

aims to be both a cultural study of 20th century Italy and a case study of cultural modernization the author examines the relationship between culture and politics particularly in the fascist period and the forms and meanings of modernization since World War II
