airasian presents complex concepts clearly so that pre service teachers can understand them and solidly grounds these concepts in best practice through practical real well integrated examples he talks to not at users the text conceives of classroom assessment in a broader way than many other texts it focuses not only on the assessment needs of testing grading interpreting standardized tests and performance assessments but also on assessment concerns in organizing a classroom at the start of school planning and implementing instruction and strategies of teacher self reflection it views classroom assessment as an everyday ongoing integral part of teaching not something that is separated from life in classrooms the text is organized in a manner that follows the natural progression of teacher decision making from organizing the class as a learning community to planning and conducting instruction to the formal evaluation of learning and finally to grading

the special mission of assessment in the classroom is to show how assessment principles apply to the full range of teacher decision making from organizing the class as a social system to planning and conducting instructions to the formal evaluation of learning and finally to grading the goal is to show students that assessment is an everyday ongoing part of their teaching not some esoteric affair that is divorced from their daily routine with this in mind the following features have been built into this text

written specifically for school administrators and those preparing to be school administrators this easy to read book contains only what is needed by leaders in today's assessment dominated world of educational accountability the content of the text is unabashedly practical addressed specifically to the assessment related needs of today's school administrators the real world orientation of the book based on the author's extensive and continuing work in the nation's public schools makes the book attractive to those instructors who teach assessment courses taken by prospective school administrators students and in service school administrators will recognize that this text is not loaded with dry abstruse content about measurement and psychometric exotica this book deals with the real world measurement issues that today's educational leaders will most certainly encounter

like other big city school systems chicago's has been repeatedly reformed over the last century yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students many blame the educational establishment for resisting change other critics argue that reform occurs too often still others claim it comes not often enough dorothy ships reappraises the tumultuous history of educational progress in chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform throughout the twentieth century

managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out. Shipp's chronicles how Chicago's corporate actors led, abetted, or restrained nearly every attempt to transform the city's school system. Then she asks whether schools might be better reformed by others to show why city schools have failed urban children so badly. She traces Chicago's reform history over four political eras, revealing how corporate power was instrumental in designing and revamping the system. Her narrative encompasses the formative era of 1880-1930 when teachers' unions moderated business plans; previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform; and the decentralization of the 1980s. She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system, a governing regime now challenged by privatization advocates. Business people may be too wedded to a stunted view of educators to forge a productive partnership for change. Unionized teachers bridle at the second-class status accorded them by managers if reform is to reach deeply into classrooms. Shipp concludes it might well require a new coalition of teachers' unions and parents to create a fresh agenda that supersedes corporate interests. This study clearly shows that in Chicago, as elsewhere, urban schooling is intertwined with politics and power. By reviewing more than a century of corporate efforts to make education work, Shipp makes a strong case that it's high time to look elsewhere, perhaps to educators themselves, for new leadership.
