it has been a true pleasure to have had the opportunity to peruse the second edition of palliative care nursing this book authored predominately by uk based experts succeeds in presenting sophisticated thoughts in readily accessible language each chapter begins with a summary of key points with both classic and new relevant literature well integrated into the text i have also been particularly impressed with the editors final chapter in which they synthesize a number of crucial issues for the future development of palliative care this second edition makes a significant contribution to both the palliative care literature as well as to nursing literature carol tishelman karolinska institutet stockholm sweden i find palliative care nursing a very attractive book for nurses but also for other disciplines to learn about nursing and to learn about palliative care the book is voluminous informative and educationally well constructed

frameworks and models in this book will give nurses the opportunity to make up their own process to offer support and be a carer for the incurably ill person and his/her family as a skilled companion. This book gives the possibility for nurses to spread one clear voice about palliative care nursing. Congratulations to all the authors: Martine de Vlieger, palliatieve hulpverlening Antwerpen v z w, University of Antwerp, Belgium; this book should be compulsory reading for nurses and other health care workers who are involved in the care of people in the final stages of life. It provides a comprehensive account of the major issues: clinical, professional, sociological, and political that confront contemporary palliative care, while also offering strategies to move forward. The real world of palliative care is described and critiqued, and the rhetoric is dispensed with. This book is a vital resource for nursing practice, learning, and teaching. Associate Professor Peter Hudson, RN, PhD, Director of the Centre for Palliative Care Research and Education, St Vincent's Hospital and the University of Melbourne, Australia. This is an excellent book for anyone completing either an academic qualification or who wants to understand the who, what, and where of palliative care, both in the UK and abroad. Its detail is balanced with case studies and practical illustrations that bring the academic nature of its writing to life. For reference purposes for anyone completing academic work, it has to be an absolute must. Nursing Times: The second edition of this innovative textbook has been extensively revised and updated to reflect new global developments in palliative care. This textbook reviews current research and examines the evidence base for palliative care policy and practice. Over a third of the chapters are newly commissioned from leading international contributors, building on the widely acclaimed original edition. The textbook focuses on palliative care for adults in a variety of care environments. The first three sections use a novel framework: the trajectory of life-limiting illness to cover key issues, including what happens to people as they become ill, how individuals cope as they near death and are dying, how families and friends deal with bereavement and loss. The final section addresses contemporary issues in nursing and inter-professional working. The book is written with helpful overviews and in an informative and reader-friendly style. There are numerous examples of clinical situations and research studies which are examined in depth to illustrate debates in palliative care. The textbook spans the range of end-of-life contexts which are of relevance to practitioners, educationalists, and researchers. Palliative Care Nursing: Essential Reading for Post-qualification Nursing Students and All Nurses and Health and Social Care Professionals who provide care to people with advanced illness and those who are near the end of life. This broad-ranging critical text will be invaluable to students and practitioners working with people and their families near the end of life.

The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available. Dr Betty Rolling Ferrell and Dr Judith A. Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical, psychological, social, and spiritual needs pertinent to the successful palliative care team. Organized within 7 sections, this new edition covers the gamut of principles of care from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters, including chapters on advance care planning, organ donation, self-care, global palliative care, and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning, and a strong evidence-based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for specialty hospice agencies and palliative care programs, as well as generalist knowledge for schools of nursing, oncology, critical care, and pediatric. Developed with the intention of emphasizing the need to extend palliative care beyond the

specialty to be integrated in all settings and by all clinicians caring for the seriously ill this new edition will continue to serve as the cornerstone of palliative care education

this textbook has introduced concepts and methods of education which help to move palliative nursing forward as an evidenced based practice of whole person care betty ferrell phd faan research scientist from the foreword in this comprehensive textbook on palliative care nursing editors marianne matzo and deborah witt sherman succeed in bringing together the heart of nursing and the true meaning of palliative care with the most current evidence based practice geripal palliative care is a philosophy of caregiving that integrates disease modification with supportive compassionate therapies for patients at the end of life palliative care nurses are responsible for alleviating pain and other physical symptoms along with satisfying the emotional social cultural and spiritual needs of patients who are facing life threatening illness this third edition of palliative care nursing provides more comprehensive newly updated content knowledge attitudes skills and cutting edge teaching and learning strategies to achieve the aacn end of life nursing competencies providing a lifespan approach now in its third edition this book continues to emphasize the value of complementary holistic modalities in promoting health wholeness and wellness even as death approaches key topics discussed ethical aspects of palliative care legal aspects of end of life decision making loss suffering grief and bereavement on the part of patients and their families symptom specific nursing management of pain anxiety depression fatigue malnutrition and dehydration all common to palliative care how to communicate with the seriously ill and dying patients their families and their health care providers disease specific aspects of palliative care for those battling cancer heart disease lung disease hiv aids end stage renal and liver disease neurological and other disorders
