contains documentation for the following spss facilities tablebuilder matrix probit plot alscat cluster quick cluster lisrel hilog

this book grew from a one semester course offered for many years to a mixed audience of graduate and undergraduate students  
 who have not had the luxury of taking a course in measure theory the core of the book covers the basic topics of independence  
 conditioning martingales convergence in distribution and fourier transforms in addition there are numerous sections treating topics  
 traditionally thought of as more advanced such as coupling and the kmt strong approximation option pricing via the equivalent  
 martingale measure and the isoperimetric inequality for gaussian processes the book is not just a presentation of mathematical

theory but is also a discussion of why that theory takes its current form it will be a secure starting point for anyone who needs to invoke rigorous probabilistic arguments and understand what they mean
