Oscar Niemeyer born in 1907 is widely considered this century's leading Latin American architect as well as one of the pioneers of modern architecture. This volume explores the major themes and sources of the most important works from all phases of Niemeyer's career from the early collaborations of the 1930s and 1940s with Lucio Costa, the spiritual father of Brazilian modernism to the 1989 Memorial da América Latina in São Paulo. A complex that reveals the maturation of Niemeyer's free form style in the service of his utopian vision. A central theme of Niemeyer's work has been its reflection of the Brazilian *jeito*, a sinuous and improvisational style manifested in everything from the country's sensual undulating landscape to its attraction to spontaneous impulses best known through its vibrant music and dance. The *jeito* and the milieu of Rio de Janeiro lie at the heart of Niemeyer's free form style which emphasizes the inherent plasticity of the native curve over the rigid rectilinearity of the International Style in Europe. A second theme treats the influence on Niemeyer of the poetic style of Le Corbusier. Also considered are Niemeyer's attraction to surrealist biomorphic forms and his desire to express a sense of the fantastic in architecture. A final theme is Niemeyer's search for an aesthetic utopia that would resolve social dilemmas by wishing them away through architecture. Herein lies Niemeyer's strength for as his architecture reflects the multiple dichotomies of the Brazilian experience it projects an emotive universality that few architects have been able to achieve.
