since the 1970s i have pursued three separate but overlapping and sometimes simultaneous careers 1 philosopher writer teacher historian of the long nineteenth century 1789 1914 2 editor translator photographer publisher biographer encyclopedist 3 cataloging librarian rare

books and special collections librarian historian of medicine somehow these three vocations have garnered me some acclaim even an entry in who's who in america each of them has resulted in some published or presented works because these works have been scattered in a wide variety of venues some of which have gone out of print or have otherwise become generally unavailable and of course with the oral presentations being gone as soon as they are given i have thought it wise to select epitomize and bring them together in one place here thus what follows in these volumes is what i consider to be the most important of my shorter works all translations are my own unless otherwise indicated

the landmark guide to internal medicine updated and streamlined for today's students and clinicians the only place you can get all the great content found in the two print volumes and the acclaimed dvd in one convenient resource through six decades no resource has matched the authority esteemed scholarship and scientific rigor of harrison's principles of internal medicine capturing the countless advances and developments across the full span of medicine the new 19th edition of harrison's provides a complete update of essential content related to disease pathogenesis clinical trials current diagnostic methods and imaging approaches evidence based practice guidelines and established and newly approved treatment methods here are just a few of the outstanding features of the new nineteenth edition content is practically organized around two basic themes education and clinical practice the teaching and learning sections cover foundational principles cardinal manifestations of disease and approach to differential diagnosis the content devoted to clinical practice focuses on disease pathogenesis and treatment new chapters on important topics such as men's health the impact of global warming on infectious diseases fatigue and many more critical updates in management and therapeutics in hepatitis coronary artery disease ebola virus disease multiple sclerosis diabetes hypertension deep vein thrombosis and pulmonary embolism acute and chronic kidney disease inflammatory bowel disease lipoprotein disorders hiv and aids and more increased number of the popular harrison's clinical algorithms clinically relevant radiographic examples spanning hundreds of diseases
