winner of a 2006 choice magazine outstanding academic title award as medieval chinese manuscripts were copied and recopied through the centuries both mistakes and deliberate editorial changes were introduced thereby affecting readers impressions of the author s intent in tao yuanming and manuscript culture xiaofei tian shows how readers not only experience authors but produce them by shaping texts to their interpretation tian examines the mechanics and history of textual transmission in china by focusing on the evolution over the centuries of the reclusive poet tao yuanming into a figure of epic stature considered emblematic of the national character tao yuanming also known as tao qian 365 427 c e is admired for having turned his back on active government service and city life to live a simple rural life of voluntary poverty the artlessness of his poetic style is held as the highest literary and moral ideal and literary critics have taken great pains to demonstrate perfect consistency between tao yuanming s life and poetry earlier work on tao yuanming has tended to accept this image interpreting the poems to confirm the image tao yuanming and manuscript culture is a study of how this cultural icon was produced and of the elusive traces of another historical tao yuanming behind the icon by comparing four early biographies of the poet tian shows how these are in large measure constructed out of tao yuanming s self image as projected in his poetry and prose drawing on work in european medieval literature she demonstrates the fluidity of the chinese medieval textual world and how its materials were historically reconfigured for later purposes tian finds in tao s poetic corpus not one essentialized tao yuanming but multiple texts continuously produced long after the author s physical demise her provocative look at the influence of manuscript culture on literary perceptions transcends its immediate subject and has special resonance today when the transition from print to electronic media is shaking the literary world in a way not unlike the transition from handwritten to print media in medieval china

many heat transfer problems are time dependent such unsteady or transient problems typically arise when the boundary conditions of a system are changed for example if the surface temperature of a system is altered the temperature at each point in the system will also begin to change the changes will continue to occur until a steady state temperature distribution is reached consider a hot metal billet that is removed from a furnace and exposed to a cool air stream energy is transferred by convection and radiation from its surface to the surroundings energy transfer by conduction also occurs from the interior of the metal to the surface and the temperature at each point in the billet decreases until a steady state condition is reached the final properties of the metal will depend significantly on the time temperature history that results from heat transfer controlling the heat transfer is one key to fabricating new materials with enhanced properties the author s objective in this textbook is to develop procedures for determining the time dependence of the temperature distribution within a solid during a transient process as well as for determining heat transfer between the solid and its surroundings the nature of the procedure depends on assumptions that may be made for the process if for example temperature gradients within the solid may be neglected a comparatively simple approach termed the lumped capacitance method or negligible internal resistance theory may be used to determine the variation of temperature with time the entire book has been thoroughly revised and a large number of solved examples and additional unsolved problems have been added this book contains comprehensive treatment of the subject matter in simple and direct language

the book comprises eight chapters all chapters are saturated with much needed text supported and by simple and self explanatory examples
