many political regimes today draw such legitimacy as they have from a revolution the destruction of an existing political elite and its replacement by a different group or groups drawn from inside the same society a large part of the ideological dispute in world politics has come in consequence to turn on an interpretation of the character of revolutions as political and social events it is extremely difficult to separate ideological assessments of the desirability or otherwise of what has occurred in revolutions from causal explanations of why these revolutions occurred and both major traditions in the analysis of revolutionary phenomena have been damaged by their failure to distinguish clearly between explanation and assessment in examining eight major revolutions of the twentieth century john dunn helps readers to remedy this state of affairs by thinking for themselves

revolution is an idea that has been one of the most important drivers of human activity since its emergence in its modern form in the 18th century from the american and french revolutionaries who upset a monarchical order that had dominated for over a millennium up to the arab spring this notion continues but has also developed its meanings equated with democracy and legal equality at first and surprisingly redefined into its modern meaning revolution has become a means to create nations change the social order and throw out colonial occupiers and has been labelled as both conservative and reactionary in this concise introduction to the topic jack r censer charts the development of these competing ideas and definitions in four chronological sections each section includes a debate from protagonists who represent various forms of revolution and counterrevolution allowing students a firmer grasp on the particular ideas and individuals of each era this book offers a new approach to the topic
