from a modest beginning in the form of a little shrew like nocturnal insect eating ancestor that lived 200 million years ago mammals evolved into the huge variety of different kinds of animals we see today many species are still small and follow the lifestyle of the ancestor but others have adapted to become large grazers and browsers like the antelopes cattle rhinos and elephants or the lions hyaenas and wolves that prey upon them yet others evolved to be specialist termite eaters able to dig into the hardest mounds or tunnel creating burrowers and a few took to the skies as gliders and the bats many live partly in the water such as otters beavers and hippos while whales and dugongs remain permanently in the seas incapable of ever emerging onto land in this very short introduction t s kemp explains how it is a tenfold increase in metabolic rate endothermy or warm bloodedness that lies behind the high levels of activity and the relatively huge brain associated with complex

adaptable behaviour that epitomizes mammals he describes the remarkable fossil record revealing how and when the mammals gained their characteristics and the tortuous course of their subsequent evolution during which many bizarre forms such as sabre toothed cats and 30 tonne 6 m high browsers arose and disappeared describing the wonderful adaptations that mammals evolved to suit their varied modes of life he also looks at those of the mainly arboreal primates that culminated ultimately in homo sapiens about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

this very short introduction chronicles the trends and traditions of modern latin american literature arguing that latin american literature developed as a continent wide phenomenon not just an assemblage of national literatures in moments of political crisis with the spanish american war came modernismo the end of world war i and the mexican revolution produced the avant garde and the cuban revolution sparked a movement in the novel that came to be known as the boom within this narrative the author covers all of the major writers of latin american literature from andrés bello and josé maría de heredia through borges and garcía márquez to fernando vallejo and roberto bolaño

measurement is a fundamental concept that underpins almost every aspect of the modern world it is central to the sciences social sciences medicine and economics but it affects everyday life we measure everything from the distance of far off galaxies to the temperature of the air levels of risk political majorities taxes blood pressure iq and weight the history of measurement goes back to the ancient world and its story has been one of gradual standardization today there are different types of measurement levels of accuracy and systems of units applied in different contexts measurement involves notions of variability accuracy reliability and error and challenges such as the measurement of extreme values in this very short introduction david hand explains the common mathematical framework underlying all measurement the main approaches to measurement and the challenges involved following a brief historical account of measurement he discusses measurement as used in the physical sciences and engineering the life sciences and medicine the social and behavioural sciences economics business and public policy about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

introduces the conclusions of recent scholarship and research into theatrical conditions conventions and concepts in the time of shakespeare the book begins with a discussion of the origins of early modern english drama and of the theatres that were built for it attitudes to theatre and to players and what audiences expected of both are explored in the contexts of the constraints of the acting space and the political culture the book then looks at the structure and dynamics of the theatrical companies before concluding with a discussion of the genres of plays and the

expectations of them that people including writers held appendices list brief details of the major dramatists of the time and summarise the main historical and dramatic events

agriculture one of the oldest human occupations is practised all over the world using techniques ranging from the profoundly traditional to the most scientifically advanced without it we would starve yet how many of us understand what is happening in the fields that we see as we drive through the countryside how often do we think about the origins of the food in our trolley in this very short introduction paul brassley and richard soffe explain what farmers do and why they do it beginning with the most basic resource the soil they show why it is important and how farmers can increase its productivity before turning to the plants and animals that grow on it and tracing the connections between their biology and the various ways in which farmers work with them the authors conclude by looking at some of the controversial issues facing contemporary agriculture its sustainability its impact on wildlife and landscape issues of animal welfare and the affect of climate change and the development of genetically modified organisms on farmers about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

microeconomics individuals choices of where to live and work how much to save what to buy and firms decisions about location hiring firing and investment involves issues that concern us on a daily basis but when people think about economics they tend to place importance on the bigger picture macroeconomics including issues such as unemployment inflation and the competitiveness of nations in this very short introduction avinash dixit argues that the microeconomy has a large impact on the economic world arguably as much as the issues of macroeconomics dixit steers a clear path through the huge number of issues related to microeconomics explaining what happens when things go well as well as showing how they fail why that happens and what can be done about it using real life examples from around the world using the minimum of mathematics and including simple graphs he provides insights into economics from psychology and sociology to explain economic behaviour and rational choice an ideal introduction for anyone interested in business and economics about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

records of meetings 1808 1916 in v 11 27

vol 15 to the university of leipzig on the occasion of the five hundredth anniversary of its foundation from yale university and the connecticut academy of arts and sciences 1909
