this book is dedicated to a specific component of paleoneurology probably the most essential one endocasts a series of original papers collected here focuses on describing methods and techniques that are dedicated to reconstruct and study fossil endocasts through computed tools the book is particularly oriented toward hominid paleoneurology although it also includes chapters on different taxa to provide a more general view of current perspectives and problems in evolutionary neuroanatomy the first part of the book concerns techniques and tools to cast endocranial anatomy the second part deals with computed morphometrics and the third part is devoted to comparative neurobiology those who want to approach the field in general terms will find this book especially helpful as will those researchers working with endocranial anatomy and brain evolution the book will also be useful for researchers and graduate students in anthropology bioarchaeology medicine and related fields

this volume presents some of the technological highlights for the period 1947 through 2010

this book presents contexts and associations of the semiotic view in biology by making a short review of the history of the trends and ideas of biosemiotics or semiotic biology in parallel with theoretical biology biosemiotics can be defined as the science of signs in living systems a principal and distinctive characteristic of semiotic biology lies in the understanding that in living entities do not interact like mechanical bodies but rather as messages the pieces of text this means that the whole determinism is of another type

the animals that one culture likes are often hated in the next and it seems that the animals themselves know it well basically one culture s animal partner is often another culture s nightmare from hell naturally i wonder how relations between people and animals got to be so different around the world how did it happen that some cultures treat bats snakes wolves or ravens as embodiments of evil while other people treat the same animals with affection or even reverence our wars with the animals go way back beyond the light cast by our prehistoric campfires the eyes glowing in the night seemed to represent a great hostile force as we began to cultivate crops and husband a few favoured animals we generally regarded other creatures as threats to our chosen few using the logic of war we sought to maximize the populations of certain creatures and the destruction of others in the past that war effort was our great crusade for the advancement of civilization as we knew it the war had a frontier a front line and an ongoing battle on the home front expanding outward from our various cradles of civilization we progressively tamed the forests and grasslands converting them to monocrop plantations or pastures then we had to defend our monocrops from encroaching weeds insects and wild animals in this immediately engaging story and fact filled page turner of a book brian griffith looks at the range of ways we relate to animals and the stories we tell about them he asks how we choose whether buddyhood fearful respect businesslike predation or genocidal war is the most appropriate response to each species we meet he watches how our treatment of inferior beings affects our treatment of inferior people and traces some of the chain reactions we unleash when we try to weed out species we don t like without much hope of making animals fit my personal preferences he writes i wonder how good our relations can get

no detailed description available for on semiotic modeling

cosmic roots traces the five thousand year conflict between science and religion and how it has shaped our modern secular worldview told with rare clarity and striking insight this fascinating and thought provoking book focuses on the history of cosmology and its sister science astronomy for it was discoveries within these great disciplines which first led to the

conflict between science and religion the story begins with the cosmological beliefs of the ancients from the flat earth models of the sumerians and hebrews to the greek notion of the orbits of planets as divine circles topics progress from aristotle and ptolemy s integrated planetary models to the sun centered cosmologies of copernicus galileo kepler and the great isaac newton their combined scientific achievements stand as testimony to the power and imagination of the human mind this meticulously researched narrative also traces the roots of western religion based on historical events and archeological evidence it takes us on a captivating journey through western religious history from ancient paganism to the ethical monotheism of the hebrews christians and moslems along the way we follow the rise and fall of civilizations of empires cycles of war and peace unification and division the book concludes with how darwin came up with his theory of evolution and the impact of modern physics on religious beliefs the cumulative effect of the scientific discoveries presented in cosmic roots has for better or for worse led to the separation of science and religion we see in western culture today

which brilliant men and women have made ground breaking scientific discoveries over the centuries this series tracks the great scientific minds from all over the world from the earliest geniuses who lived thousands of years ago to modern scientists who are advancing knowledge way beyond our universe

this book examines homo sapiens lost connection with nature and the aftermath homo sapiens excessive footprint on the earth itself the depredations done to earth by homo sapiens the denial of global warming and other environmental issues frankenstein science and those attempting to play god the conservation of earth what the future may perhaps entail and going back to nature and coexisting on earth the book contains many statistical facts on the subject matter being discussed with more than 715 references within the bibliography and more than 120 graphs satellite images and other photographs some of the subtopics covered in this book include agriculture and the origins of modern civilization meat dairy and egg consumption current medical epidemics prescription drug epidemic mental health and drug addiction government and corporate influence poverty money greed and corporate responsibility warmongers an incarcerated and policed society living with unwarranted fear guns religion suppression of history and knowledge education and the monetary value of history and knowledge the slaughter slavery and forced assimilation of indigenous homo sapiens contemporary slavery children women family and individualism the mainstream news media world population mass consumption a surplus of senseless waste fashion cities water consumption desertification surface water and groundwater depletion wastewater and sewage sludge watercraft mineral extraction fossil fuels nuclear weapons and power toxic unnatural chemicals fertilizers and the nitrogen and phosphorus cycle pesticides atmospheric pollution ozone hole light and
